/note=Torgan: Inflorescence at begining of development (lcm-long), Vector: pSport1; Site 1: Sal1; Site_2: Not1; An unidirectional cDNA library generated from unidirectional cDNA library generated from [Inflorescence at begining of development (lcm-long)]. CDNA was prepared from polyA+ mRNA using SuperScript Plasmid System Kit (Invirongen). The double-strand cDNAs were fractionated in a sepharose CL-2B 40cm-columns and fragments sizing between 0.8 and 1.5 Kb were directionally cloned into the vector. Details of each source of RNA and library construction can be obtained at http://sucest.lad.ic.unicamp.br/public"
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     EST 09-APR-2003
